

**Public Notice Pursuant to 1 Ill. Adm. Code 245.140**

After the code updates to the Boiler and Pressure Vessel Safety rules became final on February 21, 2024, an inadvertent error concerning the issuance date for the most recent edition of API 510 was discovered in the text of the rule updates as adopted. See 41 Ill. Adm. Code 2120.20 for the full Section listing all the national codes incorporated in the rules.

These updates were published in the March 8, 2024 *Illinois Register* (at Volume 48, Page 3420). In Section 2120.20(b)(1), the date of the API-510, Eleventh Edition should be October 2022, not March 2023 as published. Please note that Errata 1 with a March 2023 date is correct. When the full text was drafted and still to the date of this request, the American Petroleum Institute's website references a March 2023 issuance date for the API-510, Eleventh Edition. However, the physical copy of the API-510 references October 2022 as the issuance month and year.

This correction is pending with the Joint Committee on Administrative Rules (JCAR) and should be finalized shortly. As corrected, the full citation to the version of API 510 incorporated into the Boiler and Pressure Vessel Safety rules will read as follows:

API-510, Eleventh Edition, October 2022, Pressure Vessel Inspection Code: In-service Inspection, Rating, Repair, and Alteration; with Errata 1 (March 2023)

If anyone has any questions about this pending correction, please feel free to reach out to Tom Andryk at (217) 785-5758. Thank you.
